

GROWCO is Good News to Grow your Company to the next level.

Growco Advanced Static Mixers SM Series are widely used by flow metering and sampling systems integration companies

The above photograph provide the simplified understanding of **Growco Advanced Static Mixer** SM Series that we have our proprietary mixing elements which are welded inside the metal tube; we have option for flange for ball valve & sampling probe (depending on our customers' requirements); we also have option for manual sampling probe (also depending on our customers' requirements).

We are very glad to have regular supports from these **Systems Intergrators (S.I.)** to prefer to use our **Growco Advanced Static Mixers** SM Series for their international projects in view of our Growco's products reliability with good mixing results within technical requirements which our competitors have more challenges to achieve them.

We would like to express our sincerest appreciations for their supports and trusts in our high quality **Growco's** products which provide good value-add to their international projects.
