

GROWCO is Good News to Grow your Company to the next level.

Growco RetailStar Automation Systems are widely used in petrol or service stations to improve our customers' profitability.

We are very pleased that our Growco RetailStar Automation Systems have been widely selected by our customers to install at their petrol or service stations to provide more conveniences to their motorists which generate more incomes to our customers.

Firstly, our Growco RetailStar Automation Systems have some different hardware options to suit our customers' requirements as well as it is user friendly to their operators.

Secondly, our Growco RetailStar Automation Systems have other options for uses with smart contactless cards for payments besides the typical cash payments at the cashiers. We are also able to do the semi-automatic option to work with other brands of dispensing pumps at their petrol stations.

Below are some of our many photographs taken before deliveries to our global customers.

We would like to express our sincerest appreciations for their supports and trusts in our high quality Growco's products.
